### ZGFB-2 floating bed white bed

#### 1. Description:

The "Hydrolite" brand FB-2 is a sort of spherical inert plastic substance. It is used to prevent the small size resin from plugging up water cap or washing out by flow in the floating bed and dual bed and dual compartment floating bed system, as well as distribute the water flow and regenerant equably.

#### 2. physical and chemical characteristic indexes

ITEMS	DATA
Matrix	Inert plastic
Appearance	White spherical grain
Moisture content %	≤6
True density g/ml	0.25-0.40
Particle size range mm	1.0-2.5
